

### Antelope Trophy Table

State & Total Tags Issued From 2014-2016	80"+ Boone & Crockett Entries From 2014-2017	Boone & Crockett Entries to # of Tags Issued	2017 Non-Refundable Hunt License and/or Stamp	2017 Non-Refundable Fees to Apply or Build Points	2017 Fees to Float (Refunded if Not Drawn)	Should I apply or build points where available?
Wyoming 149,256 Tags	80	1 in 1,866	\$0	\$14 to apply and/or \$30 for a point	Regular \$302 Special \$542	Absolutely! Wyoming is a must for serious pronghorn enthusiasts whether applying for points only or tags.
New Mexico 13,483 Tags	61	1 in 221	\$0	\$13	\$270	Yes. With no point system and low out of pocket cost, the long odds are worth playing...especially if the ranch assignment policy changes in 2018.
Nevada 11,629 Tags	34	1 in 342	\$142	\$16.50	\$0	Yes, if applying for other species. Long draw odds makes this an expensive choice for pronghorn only in my opinion.
Arizona 858 Tags	33	1 in 26	\$160	\$15	\$0	Only if applying for other species AND you are prepared for a 20+ year grind. AZ point creep has made pronghorn tags incredibly hard to draw.
Colorado 50,400 Tags	20	1 in 2,520	\$10	\$43	\$346	Probably not. The non-refundable price to apply isn't too steep. However, the best goats with decent draw odds tend to be on land with access issues.
Utah 2,838 Tags	13	1 in 218	\$65	\$10	\$0	Only if applying for other species already. UT makes it too cheap to pass up if you're already fronting license fees for other species.
Montana 80,534 Tags	11	1 in 7,321	\$25 if applying in the draw	\$25	\$200	Yes. The price is right and tags are plentiful, but beware that giant bucks are very scarce in Montana.

NOTE: The ratio of Boone & Crockett antelope per total tags issued includes either sex tags and doe tags from states like Montana, Wyoming, and Colorado where thousands of these types of tags are issued each year. This distorts the data somewhat when compared to states like Arizona that issue no doe tags at all. However, the message is clear, the states with the largest abundance of tags require a lot of self-discipline to pass on lesser goats to find a giant.
